RSBL MOBILE APP FOR BULLION TRADING

RiddiSiddhi Bullion has launched RSBL SPOT, a mobile app that will provide live international gold, silver, platinum, AM/PM fix and forex rates. The app can be downloaded free of cost. It is compatible with iPhone, BlackBerry and Android technology phones and available on their respective apps library for download. Out of 36 contracts of gold, silver and platinum on RSBL SPOT (computer version), RSBL SPOT (mobile version) system provides live bid/ask rates for most of them. Benchmark rates are displayed on mobile screens in the form of live two-way bid/ask quotes. The app will save investors' time and trading would not be restricted to just a computer screen.
